CASE STUDY - HIGHER EDUCATION

CLASSTER ALL-IN-ONE SIS HELPS GLOBAL SCHOOL FOR ENTREPRENEURSHIP STREAMLINE ACADEMIC OPERATIONS

ABOUT GLOBAL SCHOOL FOR ENTREPRENEURSHIP

Global School for Entrepreneurship is a higher education organization headquartered in Amsterdam, Netherlands. It offers Bachelor, Master, Pre Master, and other programs in entrepreneurship to an international audience of students. The curriculum is taught by field experts with industry experience.

CHALLENGES

The GS4E operations team was looking for a system that will allow the Faculty to have an in-depth, complete overview of the entire student journey, replacing manual processes handled with excel sheets.

Being a brand-new and growing organization made financing the digitalization of operations a challenging task. Having an end-to-end solution that will bring great value for money was one of the top priorities during the vendor selection process.

Also, GS4E has the strategic objective to expand to new locations. Thus, finding a reliable, cloud-based solution is crucial for running operations smoothly in the foreseeable future.

CLASSTER SOLUTIONS

Simplify Processes for Faculty and Students
Classter offers an intuitive environment for managing processes inside and outside the classroom. It offers Faculty the tools to streamline communication with students and academic management.

Hybrid Learning
The out-of-the-box integration with Canvas LMS and Zoom allows faculty and students to easily switch to a distance learning environment according to a common curriculum.

100% Cloud-Based Solution
Classter provides a reliable centralized cloud-based environment for storing and accessing students' and facultys' data, with the security of MS Azure infrastructure.
