

CLASSTER ALL-IN-ONE SIS HELPS TMAI UNIFY ACADEMIC EXPERIENCE IN 12 INTERNATIONAL LOCATIONS

ABOUT TMAI

The Master's Academy International (TMAI) provides financial and academic support to ministry and pastoral training centers worldwide. TMAI is a registered nonprofit organization, based in California US with member schools in 12 countries. TMAI's mission is to train indigenous church leaders to be approved pastor-teachers.

CHALLENGES

As an educational organization with member schools in 12 different locations, TMAI faced serious challenges managing academic and student data with its previous system.

The main objective in the research for a new Student Information system was to simplify the marking process and GPA calculation, while at the same time having centralized, real-time reporting for schools around the world.

Also, TMAI's IT department was looking for an SIS with out-of-the-box integration with Canvas LMS, that hosted the already created learning material.

CLASSTER SOLUTIONS

Unified Student Database

Classter SIS cloud architecture offers a unified database for all students across 12 different geographical locations.

Real-time, multilingual reporting

Classter provides centralized management of the 12 different schools, giving TMAI's leadership the ability to retrieve student data and academic reports in real-time, in multiple languages.

LMS Integration

The out-of-the-box integration with Canvas LMS creates an enhanced learning experience by combining the best-of-breed functionalities of both systems.

AT A GLANCE

Classter Modules

- Single DB
- Academic
- Admission
- Billing
- Surveys & Quizzes
- Custom reports

Integrations

- Canvas LMS

We needed a cloud-based SIS that would allow us to have a centralized management of our student data in 12 different countries. Classter provides us with a robust and secure solution to meet this goal.

John - Hughes

Senior VP, Academics
