CLASSTER ALL-IN-ONE SIS HELPS BIRMINGHAM CHRISTIAN COLLEGE DIGITALIZE ACADEMIC PROCESSES

ABOUT BIRMINGHAM CHRISTIAN COLLEGE

BCC is a registered training college for Christian Ministry and Mission where men and women are modeled to become faithful disciples of Jesus Christ in the church, society, and the marketplace. Situated on the Selly Oak Campus of Birmingham University, BCC has former students serving worldwide.

CHALLENGES

BCC Operations department was looking for an end-to-end student management solution for replacing manual procedures, handled with excel sheets.

They were also looking for admission software that would help BCC establish a solid procedure for handling rolling admissions and removing the inefficiencies inherent in manual management of registration processes.

Also, as BCC students and educators already heavily used Moodle LMS and MS Teams for asynchronous and distance learning, so the selected SIS should be easily integrated with those platforms and ideally enhance their usage.

CLASSTER SOLUTIONS

End-to-End Student Information System
Classter provides a reliable cloud-based environment for storing and accessing students' data, that allows the digitalization of academic processes.

MS Teams & Moodle Integration
A unified distance and asynchronous learning environment that leverages the functionality of Moodle LMS and Zoom for Education video-conferencing tool.

Rolling Admissions Management
Students' registrations and enrollment for each educational program can be carried out in a paperless online environment while all the relevant data are stored in the cloud.

AT A GLANCE

Classter Modules

- Core
- Academics & LMS
- Academic CRM
- Billing
- Single DB
- College
- Mobile App
- Thesis & Internship

Integrations

- Office 365
- MS Teams
- Moodle LMS

Classter provides a one-stop shop for all students' information systems with an added value solution for students' recruitments, admissions enquiries, and marketing including CRM management and finance.
